SUMMARY

Senior Android Engineer and Tech Lead with 10+ years building, shipping, and leading the delivery of production mobile apps in Kotlin and Java. Led cross-functional teams across time zones, owned technical architecture, and shipped features to products serving 300M+ users. Deep expertise in Jetpack Compose, clean architecture, modularization, TDD, and cross-platform delivery with Flutter — from banking-grade payment systems to on-device AI. Passionate about mentoring engineers, raising code quality, and translating business goals into reliable, high-performance software.

HIGHLIGHTS

- Recognized as Top Engineer of the Month (Feb 2026) on a leading UAE bank's next-generation payments platform.
- Led the FieldCatcher team across dual time zones, mentoring engineers through a full Android-to-Flutter rebuild and an on-time MVP.
- Shipped features to MEGA, a privacy product with 300M+ users — improving auto-fill performance 33% and reducing bugs 45%.
- Trained 30+ developers and attended Droidcon Berlin two consecutive years.

SKILLS

Languages: Kotlin, Java, Dart

Android / Jetpack: Jetpack Compose, Material 3, Android SDK, Coroutines, Flow, ViewModel, Navigation, WorkManager, DataStore, Paging 3, Hilt, Dagger, Room, Retrofit, OkHttp

Architecture & Practices: Clean Architecture, MVVM, Multi-module architecture, TDD, Agile/Scrum

Cross-platform: Flutter, custom Flutter plugins (platform channels)

Testing: JUnit, Mockito, MockK, Turbine, Espresso, Compose UI testing

Backend & Data: GraphQL, REST, Room, Firebase

Analytics & Observability: Firebase Analytics, Firebase Crashlytics, Splunk

Security & Performance: ProGuard/R8, certificate pinning, encryption, Baseline Profiles, App Startup

AI / ML: TensorFlow, PyTorch, on-device inference, DialogFlow

AI Dev Tools: GitHub Copilot, Claude (AI pair programming)

DevOps & Release: Gradle (Kotlin DSL), GitLab CI/CD, Fastlane, Firebase App Distribution, Microsoft Azure, Git, Play Console, App Bundles

EXPERIENCE

Senior Software Engineer

Synechron

Oct 2025 – Apr 2026

Bengaluru, India

- Core contributor on the next-generation retail banking app for a leading UAE retail bank, owning a major part of the Payments module — fund transfers, bill payments, and beneficiary management.
- Recognized as Top Engineer of the Month (February 2026) for technical contribution and delivery on the payments workstream.
- Designed and delivered secure, high-performance payment features end to end, ensuring reliability and maintainability for a banking-grade Android app.
- Raised automated unit-test coverage across payment flows, reducing regressions and improving release confidence in a regulated environment.
- Built automation scripts that streamlined testing workflows and cut manual QA effort each release cycle.

- Used AI pair-programming tools (GitHub Copilot and Claude) to accelerate development, code reviews, and test generation.
- Diagnosed and resolved production defects, improving overall stability and user experience, and ran demos for business stakeholders to gather feedback.

Senior Android Engineer

Jan 2023 – May 2025

Mega (Mega Privacy)

Remote

- Owned the technical architecture, implementation, and release of Search and time-based authentication (TOTP) for the Mega Password Manager.
- Enhanced auto-fill performance by 33%, improving speed and accuracy for password entry.
- Migrated legacy XML views to Jetpack Compose, modernizing the UI and improving rendering performance.
- Reduced production bug count by 15% through stronger test coverage and code reviews.
- Adopted GitHub Copilot to accelerate feature development and boost day-to-day productivity.
- Led feature ownership end to end across Mega Cloud and Password Manager — release management, performance analysis, and quality iteration.
- Collaborated with cross-functional teams to integrate features and optimize app performance.

IT Analyst

Oct 2018 – Jan 2023

Tata Consultancy Services

Cologne, Germany / Kochi, India

- Spearheaded development of the FieldCatcher Android application and rebuilt it in Flutter for cross-platform compatibility, coordinating dual-timezone delivery from Cologne.
- Integrated TensorFlow and PyTorch AI models and built custom Flutter plugins for intelligent, real-time data handling; implemented GraphQL for automatic data sync.
- Managed GitLab + Fastlane CI/CD pipelines, reducing deployment time; delivered the MVP ahead of schedule and was praised for project management.
- Back in Kochi, upgraded to Flutter 3.0 and optimized assets to cut load time 25%; led unit testing to reach 80% coverage and reduce bugs 45%, lowering crash rates and boosting engagement.
- Monitored production behavior and resolved issues proactively to ensure reliability; attended Droidcon Berlin two consecutive years.

System Engineer

Oct 2016 – Sep 2018

Tata Consultancy Services

Kochi, India

- Built and maintained a configurable Android app for the UK postal service to complex client requirements.
- Developed a Dialogflow chatbot for a hotel booking system, streamlining customer interactions.
- Created and maintained event and appointment management apps, improving usability and organization.
- Set up Azure-based CI/CD pipelines to automate deployment workflows; mentored and trained junior developers.

Assistant System Engineer

Oct 2014 – Sep 2016

Tata Consultancy Services

Kochi, India

- Began my career building telematics-based IoT mobile apps for a leading U.S. insurance client.
- Delivered multiple successful production Android apps and contributed to award-winning project teams.
- Built a strong foundation in mobile and software engineering and supported internal training initiatives.

EDUCATION

B.Tech, Government College of Engineering, Kannur

May 2014

LANGUAGES

English, Malayalam, Hindi
